PROJECTS

• Work Stream - Employee Management System

[Live Link](#) | [Client](#) | [Server](#)

This is an employee management web app with role-based authentication, dynamic dashboards, and workflow updates.

- Employee Workflow : Employees can update tasks, track progress, and manage daily workflows.
- Role-Based Access : Secure authentication with specific permissions for employees, HR, and admins.
- Payment Gateway: HR initiates payments, and admins approve salaries with anti-duplicate protection

Technologies Used : React, Node.js, MongoDB(Atlas), Express.js, React Query, React Router, Firebase Authentication, JWT, Stripe, Axios, Cors, Dotenv, React Toastify, Swal, DaisyUI, Tailwind CSS, Recharts, React Hook Form, Email.js

• Smart Pick - Product Recommendation Website

[Live Link](#) | [Client](#) | [Server](#)

A web app to view, create, delete recommendations, and comment on product queries and reviews for better purchase.

- Create a query – Post product-related queries for feedback and recommendations from other users.
- View product recommendations – Browse recommendations from others on your product queries.
- Make recommendations – Offer insights or suggestions on others' product queries.

Technologies Used : React, Node.js, MongoDB(Atlas), Express.js, React Router, Firebase Authentication, JWT, Stripe, Axios, Cors, Dotenv, React Toastify, Swal, DaisyUI, Tailwind CSS, AOS Animation, React Hook Form, Email.js

• Easy Task - To Do App

[Live Link](#) | [Client](#) | [Server](#)

Real-time task management with drag-and-drop, task categorization, task edit option and real-time-syncing.

- Manage tasks effectively – Add, edit, delete, reorder tasks, and move them across categories.
- Stay synchronized – Real-time updates ensure task changes reflect instantly across devices.
- Personalize experience – Toggle between light and dark mode for a customized interface.

Technologies Used : Hello Pangea (DnD), React, Node.js, MongoDB(Atlas), Express.js, React Query, React Router, Firebase (Auth), Axios, Cors, Dotenv, React Toastify, Swal, DaisyUI, Tailwind CSS, AOS Animation
